About Us

Zantech was established in 2007 and offers a full spectrum of program and system lifecycle engineering support services that result in value-added contributions to a wide range of Federal acquisition and development programs. The platforms and systems supported include ships, aircraft, mechanical and electronic systems, network communications systems, and C4ISR systems. Zantech staff support all aspects of the system engineering lifecycle including concept development, design, development, integration, testing, deployment and operational support. Our team is process focused. We apply our CMMI® V2.0 Maturity Level 3-appraised system engineering processes for efficient system implementation and apply our ISO 9001:2015-certified Quality Management System processes to deliver quality solutions that exceed customer expectations. We seek to apply lessons learned to implement innovative solutions which leverage technology to deliver cost effective services and solutions.
